

LoRa Sensor format is as “TTXXXXYYYZZZZ”.

TT: device type	01 = CO2, 02 = CO, 03 = PM2.5
XXXX: Temperature(°C) [int]	Value/100
YYYY : Humidity(% RH) [unsigned int]	Value/100
ZZZZ : CO, CO2 density (PPM) [unsigned int] PM2.5 density (µg/m³) [unsigned int]	Value

Example: 01096113950292

CO2: 0x01

Temperature: 0x0961 = 2401, $2401 / 100 = 24.01$ °C

Humidity: 0x1395 = 5013, $5013 / 100 = 50.13$ %RH

CO2: 0x0292 = 658 PPM
